Claims 2 and 8 have been rejoined as a generic claim has been found allowable.

In the Claims:

Claim 8, status identifier is changed to --(original)--.

4. The record is clear on the reasons the claims read over the allowable art of record. It is noted that claim 1, while reciting "a fastener", positively recites and requires the structure of the stud stem fixed to a mounting member and a sheet-shaped member, and the fastener must be capable of having a stud inserted in the end and extend through past the opposite end -i.e, it cannot have either end closed or filled with an existing screw, bolt, or pin. It is further noted that applicant has specifically defined certain claim terms:

The term "mounting member" herein means, e.g., a member, such as a body panel of an automobile, having a stud fixed thereon. The term "auxiliary member" herein means, e.g., a member to be additionally mounted to a stem of the stud
